Application/Control Number: 10/085,046

Art Unit: 2823

Applicant's election of the method of group I and the species including separating the semiconductor film from the semiconductor substrate is acknowledged. Claims 74-102,105-123,127-136,143,144-155,157 and 158 are seen to read on or be generic to the elected invention. Claims 137-142 are directed to devices and are thus non-elected. Claims 88-91,105,106,114,115,127,133,148,149 link species I and II.

Claims 78,108,134,143,158 and 159 are objected to under 37 CFR 1.75 as being a substantial duplicate of claim 75. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claims 109 and 144 are objected to under 37 CFR 1.75 as being a substantial duplicate of claim 79. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claims 128,135,136 and 157 are objected to under 37 CFR 1.75 as being a substantial duplicate of claim 76. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Application/Control Number: 10/085,046

Art Unit: 2823

Claim 82 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 82 appears to recite the step of anodization by definition which is required by claim 80.

Claims 80,84,86,96,97 and 120 are objected to because of the following informalities: In claim 80, lines 9 and 10, it is unclear what steps result in formation of the "third porous layer". In claims 84 and 86, there is no clear antecedent basis for step because plural steps are previously recited. In claims 96 and 97, it is unclear what is recited through use of "rigid" and "flexible" and specifically what properties are recited in part because rigidity is not an intrinsic property of materials in that it depends in part on physical structure and temperature. Claims 82,83,85,87 are objected to due to dependency on above named claims.

Appropriate correction is required.

It is noted that the instant claims are of substantially the same scope of claims of U.S. Patents 6326280 and 6426274. Therefor, interference proceedings are required to determine the patentability of the instant claims pending correction of the above matters.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group Receptionist whose telephone number is (571) 272-2800. See MPEP 203.08.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner George Fourson whose telephone number is (571)272-1860. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Olik Chaudhuri, can be reached on (571)272-1855. The fax number for this group is (571)273-0224 and the

Art Unit: 2823

customer service number for group 2800 is 571-272-2815. Updates can be found at http://www.uspto.gov/web/info/2800.htm.
